

# Precipio's BCR::ABL1 Panel

## 4 Breakpoint Coverage and ABL1 Mutation Detection in a Single Assay

At Precipio, our BCR::ABL1 panel is used to expand beyond standard BCR::ABL1 breakpoint testing for more **comprehensive diagnostics** in a **simple workflow** commanding **higher reimbursements**.

### Broader Breakpoint Coverage

**Precipio**

p190

p210

p203

p230

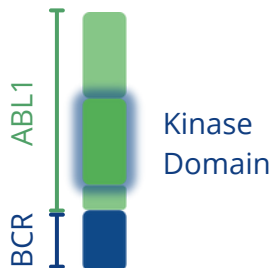

**Other Labs**

p190

p210

4 Breakpoint coverage for broader analysis of initial cases and monitoring of changes in breakpoint expression.

### Integrated ABL1 Mutation Detection

Integrated ABL1 mutation detection for therapeutic response insight.

### Simplified Laboratory Workflow

Pre-plated reagents for rapid assay preparation. Automated analysis software to streamline interpretation.

### Higher Testing Reimbursement

71% higher reimbursement\* for broader breakpoint testing. ABL1 mutation billable\*\* without additional reflex sequencing.

\*Based on Precipio clinical lab's internal data.  
\*\*For medically necessary cases.
